PROFILE

I'm a full stack web developer and self-motivated learner who loves building attractive and effective web applications that exceed expectations. I have developed a strong passion for the software development industry over the years and love what I do.

WORK EXPERIENCE

HIGH SCHOOL WORK EXPERIENCE

Digital 8

During my 1-week high school work experience at Digital8, I learned a lot from developers in a professional environment that has helped me improve as a developer and expand my technical knowledge base.

PROJECTS

FINANCIAL PORTAL

Full Stack Web Application

A full stack application built with the MERN stack and Chakra UI for design that allows users to register, create bank accounts and manage transactions. The application is hosted on Heroku so it will take a second to spin up.

[Live Project](#) - [Source Code](#)

PICBYADAM

Client Website

A front end static website for a client called "PicByAdam" with a clean, effective design. Built using HTML, CSS, Sass and JavaScript. Animations were also implemented using the GSAP library.

[Live Project](#) - [Source Code](#)

BUG TRACKER

Full Stack Web Application

A full stack web application with various features like creating projects, authentication, user roles, creating tickets for individual projects and more. Fully-responsive custom design built with Sass.

[Live Project](#) - [Source Code](#)

EDUCATION

SELF TAUGHT WEB DEVELOPMENT

Learnt web development through Udemy, YouTube and documentation.

CERTIFICATE II IN SKILLS FOR WORK AND VOCATIONAL PATHWAYS

Completed in high school
